

WINDOWS ON THE FUTURE: EFFECTIVE TEACHING STRATEGIES FOR THE MODERN WORLD WITH IAN JUKES & NICKY MOHAN

Who is Ian Jukes?

Ian is a renowned speaker and consultant, but first and foremost he is an educator. He has been a classroom teacher, a school, district, and provincial officer, and a university instructor. He is a world class speaker and international consultant who has worked with educators and organizations in more than 80 countries, and made more than 11,000 presentations. To date, he has written or co-written 17 books and nine educational series about modern learning, and has had hundreds of articles published in both educational and business journals. Ian has been recognized as one of the top ten educational speakers in America, and was recently rated the top presenter at EduTech 2014.

Who is Nicky Mohan?

Nicky has been a classroom teacher, a school and university administrator, instructional designer, business sector manager and trainer, and an international speaker. At the University of Waikato, New Zealand, she designed and delivered courses and workshops based on research of best practices in teaching and learning.

During the last 10 years, she has made hundreds of presentations in more than a dozen countries. Sharing her time between Canada and New Zealand, Nicky worked as the Director of Curriculum for the 21st Century Fluency Group. She led a team of international writers in designing lesson plans that embedded the 21st Century Fluency skills to develop real world just-in-time teaching and learning experiences that were relevant to both teachers and students. Nicky is currently the Director of The InfoSavvy Group, an international educational consulting firm.

What are they going to do?

Ian and Nicky are going to help you. Today, Australian teachers face unprecedented challenges. Modern life has brought enormous changes to the way we get information, the way we communicate with each other, the way we work, and the way we play – virtually no aspect of life has been left untouched. Along with these changes comes demands to teach a new generation of learners the essential skills needed to better prepare them for life in the modern world. Consequently, teachers are being asked to teach differently. Ian and Nicky are going to help you address these challenges.

Why are they doing this?

Because Ian and Nicky understand how hard it is to be a teacher today. Having taught in the classroom for many years, they know that teachers need support for dealing with the enormous changes that are coming to schools. We may have heard some of the reasons *why* instruction needs to change and *what* needs to be changed, but many of us just don't know *how* to accomplish this. This hands-on, full-day workshop provides proven, sustainable, research-based strategies, methods, resources, and support to empower teachers to prepare learners for success in the modern world.

“ *Yesterday's session was one of the best professional development events I've ever attended. Unlike most where someone lectures about improved pedagogy, the actual session modelled effective practice.*”

Toby Kerrison MACS (Snr) CP AFAIM

INFO SAVVY21

When is this happening?

May to July 2016 at venues throughout Australia including regional centres. Keep posted for updates on up and coming events in a location near you.

Location:

Event Locations	
Melbourne	Cairns
Geelong	Brisbane
Adelaide	Sydney
Perth	Dubbo
Darwin	Canberra
Alice Springs	Launceston
Hobart	

How will they do this?

You will be introduced to the concepts and principles of modern teaching and learning. Then, working in small groups, you will have the opportunity to share, practice, and apply these concepts. Ian and Nicky are inviting you to join them for a one-day event offered to a limited number of teachers. What will be unique about this event is the interactive nature of the presentations. Seize this unique opportunity to learn, network, share ideas, and rethink teaching for the digital age.

INFO SAVVY21

What participants will take away?

- A clear understanding of the compelling reasons why we need to change some of our current teaching practices.
- An introduction to the nine critical process skills all students must acquire.
- An introduction to the ten critical strategies for teaching those nine process skills.
- How to teach higher order thinking using the Q-Focus Questioning Technique.
- How to use the Just-In-Time-Teaching-and-Learning Model (JITTL) for project- and process-based learning.
- A Windows on the Future Handbook.
- Access to our extensive Digital Library that contains hundreds of relevant articles and resources.
- An opportunity to network and share ideas with your professional colleagues.
- A truly memorable learning experience, with ideas that will stick

What is the cost?

\$299.00 including morning/afternoon tea and lunch

Register today!!! Limited enrolment. Registration Information...

“ Ian Jukes is ‘untweetable’! The energy and enthusiasm that Ian Jukes puts into his closing keynote at EduTECH 2014 makes it feel like he could simply lift the roof off the Brisbane Convention and Exhibition Centre all together. ”

- Rebecca Vukotic editor of Australian Teacher Magazine - EduTECH 2014
